SUBJECT INDEX

Volume 57 (1988)

Abscisic acid, arachis, embryo, photomorphogenesis, ovule, 159
–, tissue culture, hormone analysis, HPLC, auxin, cytokinin, corn kernel development, 195
Adventitious shoot formation, shoot organogenesis, plant regeneration, *Liquidambar styraciflua*, American sweetgum, leaf explants, 173
Agrostis gigantea, root, cadmium, Cd-binding peptides, antibodies, ELISA, 37
Albinism, *Lolium perenne*, *Lolium multiflorum*, immature inflorescence, plant regeneration, 165
American sweetgum, shoot organogenesis, adventitious shoot formation, plant regeneration, *Liquidambar styraciflua*, leaf explants, 173
Anther culture, *Triticum aestivum*, culture temperature, haploidy, 55
Anti-oxidant, cysteine, diurnal rhythm, glutathione, spruce, sulfur metabolism, 113
Antibodies, *Agrostis gigantea*, root, cadmium, Cd-binding peptides, ELISA, 37
Arachis, abscisic acid, embryo, photomorphogenesis, ovule, 159
Aspartate pathway enzymes, lysine, threonine, *Sorghum bicolor*, growth inhibition, 93
Auxin, benzyladenine, organogenesis, *Sideritis angustifolia*, somatic embryogenesis, spermidine, 151
–, tissue culture, hormone analysis, HPLC, cytokinin, abscisic acid, corn kernel development, 195
–, *Zea mays* L., 3-*O*-methyl-D-glucose transport, 2,3,5-triiodobenzoic acid, 19

Benzyladenine, auxin, organogenesis, *Sideritis angustifolia*, somatic embryogenesis, spermidine, 151
Brassica napus, *Leptosphaeria maculans*, sirodesmin PL toxicity, *B. napus* embryogenic tissue cultures, RNA synthesis, Zn antagonism, 45
B. napus embryogenic tissue cultures, *Leptosphaeria maculans*, *brassica napus*, sirodesmin PL toxicity, RNA synthesis, Zn antagonism, 45
Brassica oleracea, cell walls, secondary zylem, parenchyma, pectin, xyloglucan, lignin, 83

Cadmium, agrostis gigantea, root, Cd-binding peptides, antibodies, ELISA, 37
Callus, *Sorghum*, callus-associated peptide, two-dimensional polyacrylamide gel electrophoresis, 235
Callus-associated peptide, *Sorghum*, callus, two-dimensional polyacrylamide gel electrophoresis, 235
Carbohydrates, *Digitalis obscura*, morphogenesis, osmotic effect, 247
Cd-binding peptides, *Agrostis gigantea*, root, cadmium, antibodies, ELISA, 37
Cell cycle, chloroplast rRNA, cytoplasmic rRNA, illumination regime, irradiance, *Scenedesmus quadricauda*, 205
Cell walls, *Brassica oleracea*, secondary zylem, parenchyma, pectin, xyloglucan, lignin, 83
Cereal proteins, immunological relatedness, homology, evolution, 103
Chimera, meiosis, color mutant, *Porphyra yezoensis*, tetrad analysis, linkage, *Rhodophyta*, 135
Chlamydomonas, seleno-tRNAs, plant selenonucleosides, HPLC, plant cell cultures, seedlings, 185
Chloroplast rRNA, cell cycle, cytoplasmic rRNA, illumination regime, irradiance, *Scenedesmus quadricauda*, 205
Citral, *Cymbopogon flexuosus*, leaf development, essential oil, sucrose metabolizing enzymes, [U-^{14}C]sucrose incorporation, 127
Color mutant, meiosis, chimera, *Porphyra yezoensis*, tetrad analysis, linkage, *Rhodophyta*, 135
Commiphora myrrh, furanosesquiterpenoids, ticks, house flies, HPLC, 181
Corn kernel development, tissue culture, hormone analysis, HPLC, auxin, cytokinin, abscisic acid, 195
Crown galls, solute transport, electrical membrane potential, energy state, 27
Cucumis sativus, protoplast, embryoid, regeneration, 63
Culture temperature, *Triticum aestivum*, anther culture, haploidy, 55
Cucurbita maxima, nitrate reductase, induction, repression, 119
Cymbopogon flexuosus, leaf development, essential oil, citral, sucrose metabolizing enzymes, [U-^{14}C]sucrose incorporation, 127
Cysteine, anti-oxidant, diurnal rhythm, glutathione, spruce, sulfur metabolism, 113
Cytokinin, tissue culture, hormone analysis, HPLC, auxin, abscisic acid, corn kernel development, 195
Cytoplasmic rRNA, cell cycle, chloroplast rRNA, illumination regime, irradiance, *Scenedesmus quadricauda*, 205

Digitalis obscura, carbohydrates, morphogenesis, osmotic effect, 247

Diurnal rhythm, anti-oxidant, cysteine, glutathione, spruce, sulfur metabolism, 113

Electrical membrane potential, solute transport, energy state, crown galls, 27
Electrofusion, *Solanum melongena*, *Solanum khasianum*, protoplast, somatic hybrids, 215
ELISA, *Agrostis gigantea*, root, cadmium, Cd-binding peptides, antibodies, 37
Embryo, abscisic acid, arachis, photomorphogenesis, ovule, 159
Embryoid, *Cucumis sativus*, protoplast, regeneration, 63
Endosperm, maize, *Oryza sativa*, rice, starch branching enzyme, 1
Energy state, solute transport, electrical membrane potential, crown galls, 27
Epiblast, somatic embryogenesis, genotype, immature embryo culture, scutellum, wheat, 225
Essential oil, *Cymbopogon flexuosus*, leaf development, citral, sucrose metabolizing enzymes, [U-^{14}C]sucrose incorporation, 127
Evolution, cereal proteins, immunological relatedness, homology, 103

Furanosesquiterpenoids, *Commiphora myrrh*, ticks, house flies, HPLC, 181

γ gliadin, storage proteins, wheat, gene structure, gene sequence, 141
Gene sequence, γ gliadin, storage proteins, wheat, gene structure, 141
Gene structure, γ gliadin, storage proteins, wheat, gene sequence, 141
Genotype, somatic embryogenesis, epiblast, immature embryo culture, scutellum, wheat, 225
Glutathione, anti-oxidant, cysteine, diurnal rhythm, spruce, sulfur metabolism, 113
Growth inhibition, lysine, threonine, *Sorghum bicolor*, aspartate pathway enzymes, 93

Hairy root disease, legumes, *Trifolium pratense*, *Macroptilium atropurpureum*, nodulation, *Rhizobium*, 73
Haploidy, *Triticum aestivum*, anther culture, culture temperature, 55
Homology, cereal proteins, immunological relatedness, evolution, 103
Hormone analysis, tissue culture, HPLC, auxin, cytokinin, abscisic acid, corn kernel development, 195
House flies, *Commiphora myrrh*, furanosesquiterpenoids, ticks, HPLC, 181
HPLC, *Commiphora myrrh*, furanosesquiterpenoids, ticks, house flies, 181
—, seleno-tRNAs, plant selenonucleosides, plant cell cultures, seedlings, *Chlamydomonas*, 185
—, tissue culture, hormone analysis, auxin, cytokinin, abscisic acid, corn kernel development, 195

Illumination regime, cell cycle, chloroplast rRNA, cytoplasmic rRNA, irradiance, *Scenedesmus quadricauda*, 205
Immature embryo culture, somatic embryogenesis, epiblast, genotype, scutellum, wheat, 225
Immature inflorescence, *Lolium perenne*, *Lolium multiflorum*, plant regeneration, albinism, 165
Immunological relatedness, cereal proteins, homology, evolution, 103
Induction, *Cucurbita maxima*, nitrate reductase, repression, 119
Irradiance, cell cycle, chloroplast rRNA, cytoplasmic rRNA, illumination regime, *Scenedesmus quadricauda*, 205

Leaf development, *Cymbopogon flexuosus*, essential oil, citral, sucrose metabolizing enzymes, [U-^{14}C]sucrose incorporation, 127
Leaf explants, shoot organogenesis, adventitious shoot formation, plant regeneration, *Liquidambar styraciflua*, American sweetgum, 173
Leaf metabolism, photosynthesis, starch levels, sucrose storage, 9
Legumes, hairy root disease, *Trifolium pratense*, *Macroptilium atropurpureum*, nodulation, *Rhizobium*, 73
Leptosphaeria maculans, *Brassica napus*, sirodesmin PL toxicity, *B. napus* embryogenic tissue cultures, RNA synthesis, Zn antagonism, 45
Lignin, cell walls, Brassica oleracea, secondary xylem, parenchyma, pectin, xyloglucan, 83
Linkage, meiosis, color mutant, chimera, *Porphyra yezoensis*, tetrad analysis, *Rhodophyta*, 135
Liquidambar styraciflua, shoot organogenesis, adventitious shoot formation, plant regeneration, American sweetgum, leaf explants, 173
Lolium multiflorum, *Lolium perenne*, immature inflorescence, plant regeneration, albinism, 165
Lolium perenne, *Lolium multiflorum*, immature inflorescence, plant regeneration, albinism, 165
Lysine, threonine, *Sorghum bicolor*, growth inhibition, aspartate pathway enzymes, 93

Macroptilium atropurpureum, hairy root disease, legumes, *Trifolium pratense*, nodulation, *Rhizobium*, 73
Maize, endosperm, *Oryza sativa*, rice, starch branching enzyme, 1
Meiosis, color mutant, chimera, *Porphyra yezoensis*, tetrad analysis, linkage, *Rhodophyta*, 135
3-*O*-methyl-D-glucose transport, *Zea mays* L., auxin, 2,3,5-triiodobenzoic acid, 19
Morphogenesis, carbohydrates, *Digitalis obscura*, osmotic effect, 247

Nitrate reductase, *Cucurbita maxima*, induction, repression, 119
Nodulation, hairy root disease, legumes, *Trifolium pratense*, *Macroptilium atropurpureum*, *Rhizobium*, 73

Organogenesis, auxin, benzyladenine, *Sideritis angustifolia*, somatic embryogenesis, spermidine, 151
Oryza sativa, endosperm, maize, rice, starch branching enzyme, 1
Osmotic effect, carbohydrates, *Digitalis obscura*, morphogenesis, 247
Ovule, abscisic acid, arachis, embryo, photomorphogenesis, 159

Parenchyma, cell walls, *Brassica oleracea*, secondary zylem, pectin, xyloglucan, lignin, 83
Pectin, cell walls, *Brassica oleracea*, secondary zylem, parenchyma, xyloglucan, lignin, 83
Photomorphogenesis, abscisic acid, arachis, embryo, ovule, 159
Photosynthesis, starch levels, leaf metabolism, sucrose storage, 9
Plant cell cultures, seleno-tRNAs, plant selenonucleosides, HPLC, seedlings, *Chlamydomonas*, 185
Plant regeneration, *Lolium perenne*, *Lolium multiflorum*, immature inflorescence, albinism, 165
—, shoot organogenesis, adventitious shoot formation, *Liquidambar styraciflua*, American sweetgum, leaf explants, 173
Plant selenonucleosides, seleno-tRNAs, HPLC, plant cell cultures, seedlings, *Chlamydomonas*, 185
Porphyra yezoensis, meiosis, color mutant, chimera, tetrad analysis, linkage, *Rhodophyta*, 135
Protoplast, Cucumis sativus, embryoid, regeneration, 63
—, *Solanum melongena*, *Solanum khasianum*, electrofusion, somatic hybrids, 215

Regeneration, *Cucumis sativus*, protoplast, embryoid, 63
Repression, *Cucurbita maxima*, nitrate reductase, induction, 119
Rhizobium, hairy root disease, legumes, *Trifolium pratense*, *Macroptilium atropurpureum*, nodulation, 73
Rhodophyta, meiosis, color mutant, chimera, *Porphyra yezoensis*, tetrad analysis, linkage, 135
Rice, endosperm, maize, *Oryza sativa*, starch branching enzyme, 1
RNA synthesis, *Leptosphaeria maculans*, *Brassica napus*, sirodesmin PL toxicity, *B. napus* embryogenic tissue cultures, Zn antagonism, 45
Root, *Agrostis gigantea*, cadmium, Cd-binding peptides, antibodies, ELISA, 37

[U-^{14}C]Sucrose incorporation, *Cymbopogon flexuosus*, leaf development, essential oil, citral, sucrose metabolizing enzymes, 127
Scenedesmus quadricauda, cell cycle, chloroplast rRNA, cytoplasmic rRNA, illumination regime, irradiance, 205
Scutellum, somatic embryogenesis, epiblast, genotype, immature embryo culture, wheat, 225
Secondary zylem, cell walls, *Brassica oleracea*, parenchyma, pectin, xyloglucan, lignin, 83
Seedlings, seleno-tRNAs, plant selenonucleosides, HPLC, plant cell cultures, *Chlamydomonas*, 185
Seleno-tRNAs, plant selenonucleosides, HPLC, plant cell cultures, seedlings, *Chlamydomonas*, 185
Shoot organogenesis, adventitious shoot formation, plant regeneration, *Liquidambar styraciflua*, American sweetgum, leaf explants, 173
Sideritis angustifolia, auxin, benzyladenine, organogenesis, somatic embryogenesis, spermidine, 151
Sirodesmin PL toxicity, *Leptosphaeria maculans*, *Brassica napus*, *B. napus* embryogenic tissue cultures, RNA synthesis, Zn antagonism, 45
Solanum khasianum, *Solanum melongena*, protoplast, electrofusion, somatic hybrids, 215
Solanum melongena, *Solanum khasianum*, protoplast, electrofusion, somatic hybrids, 215
Solute transport, electrical membrane potential, energy state, crown galls, 27
Somatic embryogenesis, auxin, benzyladenine, organogenesis, *Sideritis angustifolia*, spermidine, 151
Somatic embryogenesis, epiblast, genotype, immature embryo culture, scutellum, wheat, 225
Somatic hybrids, *Solanum melongena*, *Solanum khasianum*, protoplast, electrofusion, 215
Sorghum, callus, callus-associated peptide, two-dimensional polyacrylamide gel electrophoresis, 235
Sorghum bicolor, lysine, threonine, growth inhibition, aspartate pathway enzymes, 93
Spermidine, auxin, benzyladenine, organogenesis, *Sideritis angustifolia*, somatic embryogenesis, 151
Spruce, anti-oxidant, cysteine, diurnal rhythm, glutathione, sulfur metabolism, 113
Starch branching enzyme, endosperm, maize, *Oryza sativa*, rice, 1
Starch levels, photosynthesis, leaf metabolism, sucrose storage, 9
Storage proteins, γ gliadin, wheat, gene structure, gene sequence, 141
Sucrose metabolizing enzymes, *Cymbopogon flexuosus*, leaf development, essential oil, citral, [U-^{14}C]sucrose incorporation, 127
Sucrose storage, photosynthesis, starch levels, leaf metabolism, 9
Sulfur metabolism, anti-oxidant, cysteine, diurnal rhythm, glutathione, spruce, 113

Tetrad analysis, meiosis, color mutant, chimera, *Porphyra yezoensis*, linkage, *Rhodophyta*, 135
Threonine, lysine, *Sorghum bicolor*, growth inhibition, aspartate pathway enzymes, 93
Ticks, *Commiphora myrrh*, furanosesquiterpenoids, house flies, HPLC, 181
Tissue culture, hormone analysis, HPLC, auxin, cytokinin, abscisic acid, corn kernel development, 195
2,3,5-Tridobenzoic acid, *Zea mays* L., 3-*O*-methyl-D-glucose transport, auxin, 19
Trifolium pratense, hairy root disease, legumes, *Macroptilium atropurpureum*, nodulation, *Rhizobium*, 73

Triticum aestivum, anther culture, culture temperature, haploidy, 55
Two-dimensional polyacrylamide gel electrophoresis, *Sorghum*, callus, callus-associated peptide, 235

Wheat, somatic embryogenesis, epiblast, genotype, immature embryo culture, scutellum, 225
—, γ gliadin, storage proteins, gene structure, gene sequence, 141

Xyloglucan, cell walls, *Brassica oleracea*, secondary zylem, parenchyma, pectin, lignin, 83

Zea mays L., 3-*O*-methyl-D-glucose transport, auxin, 2,3,5-triiodobenzoic acid, 19
Zn antagonism, *Leptosphaeria maculans*, *Brassica napus*, sirodesmin PL toxicity, *B. napus* embryogenic tissue cultures, RNA synthesis, 45

VOLUME CONTENTS

Volume 57 (1988)

PHYSIOLOGY AND BIOCHEMISTRY

Some properties of starch branching enzyme from Indica rice endosperm (*Oryza sativa* L.)
by D.A. Smyth (Tarrytown, NY) 1–8

Effects of phosphate deficiency on assimilate partitioning in barley seedlings
by R.C. Sicher and D.F. Kremer (Beltsville, MD) 9–17

1-Naphthaleneacetic acid stimulates active 3-*O*-methyl-D-glucose uptake in sections of 5-day-old coleoptiles of *Zea mays* L.
by T. Rausch, D.N. Butcher and G. Hudd (Frankfurt, F.R.G. and Bristol, U.K.) 19–25

Solute accumulation and electrical membrane potential in *Agrobacterium tumefaciens*-induced crown galls in *Kalanchoë daigremontiana* leaves
by S. Marx and C.I. Ullrich-Eberius (Darmstadt, F.R.G.) 27–36

An enzyme-linked immunosorbent assay for plant cadmium-binding peptide
by W.E. Rauser, A.A. Quesnel, J.S. Lam and G.G. Southam (Guelph, Canada) 37–43

Biological effects of sirodesmin PL, a phytotoxin produced by *Leptosphaeria maculans*
by T. Rouxel, Y. Chupeau, R. Fritz, A. Kollmann and J.-F. Bousquet (Versailles, France) 45–53

CELL AND TISSUE STUDIES IN VITRO

The influence of different temperature treatments on anther culture response of spring wheat (*Triticum aestivum* L.)
by H. Li, J.A. Qureshi and K.K. Kartha (Saskatoon, Canada) 55–61

Plant regeneration from cucumer (*Cucumis sativus*) protoplasts
by C.M. Colijn-Hooymans, R. Bouwer, W. Orczyk and J.J.M. Dons (Wageningen, The Netherlands and Warsaw, Poland) 63–71

GENERAL

Characterization and culture of *Agrobacterium rhizogenes* transformed roots of forage legumes
by K.H. Beach and P.M. Gresshoff (Canberra, Australia) 73–81

Lignified and non-lignified cell walls from kale
by W.D. Wilson, J.M. Barwick, J.A. Lomax, M.C. Jarvis and H.J. Duncan (Glasgow, U.K.) 83–90

Corrigendum 91

PHYSIOLOGY AND BIOCHEMISTRY

Inhibitory effects of aspartate-derived amino acids and aminoethylcysteine, a lysine analog, on the growth of sorghum seedlings; relation with three enzymes of the aspartate-pathway
by I. Piryns, S. Vernaillen and M. Jacobs (Brussels, Belgium) 93–101

Immunological relationships among the major seed proteins of cereals
by T.W. Okita, H.B. Krishnan and W.T. Kim (Pullman, WA) 103–111

Diurnal changes in the glutathione contest of spruce needles (*Picea abies* L.)
by R. Schupp and H. Rennenberg (Garnisch-Partenkirchen, F.R.G.) 113–117

Metabolite control of squash nitrate reductase
by R.L. Langendorfer, M.T. Watters and J. Smarrelli, Jr. (Chicago, IL) 119–125

Sucrose metabolism and essential oil accumulation during lemongrass (*Cymbopogon flexuosus* stapf.) leaf development
by N. Singh and R. Luthra (Lucknow, India) 127–133

GENETICS AND MOLECULAR BIOLOGY

Tetrad analysis in conchospore germlings of *Porphyra yezoensis* (Rhodophyta, Bangiales)
by M. Ohme and A. Miura (Tsukuba Science City and Tokyo, Japan) 135–140

Nucleotide sequence of a γ gliadin gene: comparisons with other γ gliadin sequences show the structure of γ gliadins genes and the general primary structure γ gliadins
by K. Scheets and C. Hedgcoth (Manhattan, KS) 141–150

CELL AND TISSUE STUDIES IN VITRO

Morphogenesis in vitro of *Sideritis angustifolia:* effects of auxins, benzyladenine and spermidine
by M.C. Sánchez-Gras and J. Segura (Valencia, Spain) 151–158

The role of the peanut (*Arachis hypogaea*) ovular tissue in the photo-morphogenetic response of the embryo
by M. Ziv and O. Kahana (Rehovot, Israel) 159–164

The effect of 2,4-dichlorophenoxyacetic acid and donor plant environment on plant regeneration from immature inflorescence-derived callus of *Lolium perenne* L. and *Lolium multiflorum* L.
by J. Creemers-Molenaar, J.P.M. Loeffen and P. Van der Valk (Wageningen, The Netherlands) .. 165–172

In vitro adventitious shoot formation on mature-phase leaves and petioles of *Liquidambar styraciflua* L.
by M.H. Brand and R.D. Lineberger (Columbus and Clemson, SC) 173–179

GENERAL

Furanosesquiterpenoids from *Commiphora myrrh* oil
by A. Maradufu and J.D. Warthen, Jr. (Arusha, Tanzania and Beltsville, MD) 181–184

PHYSIOLOGY AND BIOCHEMISTRY

Ubiquity of selenium-containing tRNA in plants
by T.-N. Wen, C. Li and C.-S. Chen (Taiwan, China) 185–193

Endogenous hormone levels of immature corn kernels of A188 Missouri-17, and DeKalb XL-12
by M.G. Carnes and M.S. Wright (Research Triangle Park, NC) 195–203

Regulation of chloroplast and cytoplasmic rRNA accumulation by light energy and its relation to reproductive events during the cell cycle of the alga *Scenedesmus quadricauda*
by V. Cepák and V. Zachleder (Třeboň, Czechoslovakia) 205–213

CELL AND TISSUE STUDIES IN VITRO

Electrofusion for the production of somatic hybrid plants of *Solanum melongena* and *Solanum khasianum* C.B. Clark
by D. Sihachakr, R. Haicour, I. Serraf, E. Barrientos, C. Herbreteau, G. Ducreux, L. Rossignol and V. Souvannavong (Orsay, France) 215–223

A comparison of scutellum callus and epiblast callus induction in wheat: the effect of genotype, embryo age and medium
by D.G. He, Y.M. Yang and K.J. Scott (St. Lucia, Australia) 225–233

Analysis of growth in sorghum callus cultures and association with a 27 kd peptide
by C.A. Wozniak and J.E. Partridge (Lincoln, NE) 235–246

Morphogenesis in hypocotyl cultures of *Digitalis obscura:* influence of carbohydrate levels and sources
by L. Lapeña, P. Pérez-Bermúdez and J. Segura (Valencia, Spain) 247–252
